Comit presenta la nuova collezione ALU DESIGN, come linea alternativa, innovativa ed ECOLOGICA di maniglie in alluminio.

L'alluminio, già ampiamente diffuso a livello mondiale, è un materiale a basso impatto ambientale, in quanto può essere riciclato al 100% ed infinite volte senza perdere le proprie caratteristiche quali elevata leggerezza, duttilità e malleabilità ma con alta resistenza alla corrosione degli agenti atmosferici.

Noi abbiamo unito queste caratteristiche a maniglie dal design moderno e lineare, con finiture innovative, che le rendono adatte a tutti gli ambienti e a tutti i mercati.

Comit presents the new ALU DESIGN collection, as an alternative, new and ECOLOGICAL line of aluminum handles.

Aluminum, which is already widely diffused, is a material without environmental impact, as it can be 100% recycled and infinite times without losing its main features, such as lightness, flexibility and malleability but with high resistance to atmospheric corrosion.

We joined these features to handles with a modern and clean design and new colors, that make them suitable for every setting and for every market.
